DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 and 9-23 rejected under 35 U.S.C. 102(b) as being anticipated by Hasey.

The Hasey reference discloses a medication dispensing apparatus for capsules or pills (see col. 8, lines 12-15) comprising an endless track 5 with a plurality of receptacles 6 to accommodate pills or capsules, wherein the endless track defines two fold sections directed inward towards each other (see U-shaped ends proximate the turns in the endless track.

In regard to claims 17 and 18, although the Hasey disclosure is silent as to the capsules are cylindrical and containing powder, Examiner takes the position that capsules are conventionally cylindrical and filled with powder medicament, and Examiner has no reason to believe the capsules of Hasey would be otherwise.

Conclusion

Claims 5-8,24 and 25 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
